Azure Data Engineer

Experienced Azure Data Engineer with expertise in designing and optimizing cloud-based data solutions using Azure Data Factory, Azure Synapse, and related Azure services. Proven ability to develop and automate robust ETL pipelines with SQL Server Integration Services and Python scripting, enhancing data quality and performance. Skilled in data warehousing, reporting, and business intelligence tools including Power BI, SSRS, and SSAS. Strong collaborator with cross-functional teams, adept at delivering reliable, scalable data platforms aligned with business needs.

SKILLS

Cloud Platforms and Services: Azure Data Factory, Azure Synapse, Azure Storage, Azure Data Lake, Cloud Computing, SaaS.

Databases and Query Languages: MS SQL Server, Oracle, MySQL, Teradata, T-SQL, PL/SQL, DDL, DML, TCL, Dynamic SQL, SQL Developer, BTEQ, SQL Assistant.

ETL and Data Integration Tools: SSIS, Informatica PowerCenter, DataStage, Python, Python Scripting, Batch Scripting, Informatica Designer, Repository Manager, Workflow Manager, Workflow Monitor, FastLoad, MultiLoad, TPump.

Data Warehousing and BI Technologies: EDW, ODS, Data Marts, Star Schema, Snowflake Schema, MOLAP, ROLAP, Fact Tables, Dimension Tables, Slowly Changing Dimensions, Surrogate Keys, Power BI, SSRS, SSAS, Tableau, Data Modeling, Data Visualization, SQL Query Optimization, Indexing, SQL Profiler, ETL Performance Tuning.

PROFESSIONAL EXPERIENCE

Data engineer, Merck Pharma

Jun 2023 - Present | Remote

- Engineered over 20 Azure Data Factory pipelines integrating on-premises data into Azure Synapse, collaborating with stakeholders to enhance data reliability and processing speed by 30%.
- Optimized complex T-SQL queries and applied SQL query optimization techniques to improve ETL pipeline efficiency and reduce processing times by 25%.
- Automated 15+ SSIS ETL workflows with Python scripting, streamlining data processing and reducing manual errors through clear communication with the operations team.
- Developed Power BI dashboards using Azure Synapse and Azure Storage data, enabling interactive drill-down and drill-through reporting to enhance business insights.
- Maintained Informatica PowerCenter mappings and workflows using Designer, Repository Manager, and Workflow Monitor to ensure robust data integration and timely issue resolution.
- Tuned dynamic SQL queries through SQL query optimization, enhancing system performance and reducing report generation times by up to 20% in compliance-driven data workflows.
- Managed Azure Data Lake access using Access Control Lists and documented data security protocols to ensure compliance and protect sensitive pharmaceutical data.

SQL Developer, Arch Insurance

May 2022 - Jun 2023 | NJ, US

- Developed over 30 complex PL/SQL scripts using Oracle to automate data extraction and transformation, reducing manual processing errors by 25% through effective problem solving.
- Designed MySQL DML procedures and implemented parameterized reporting solutions, improving data accuracy and supporting cross-team communication.
- Scheduled and automated 15+ batch jobs using SQL Server Agent and batch scripting, enhancing production support responsiveness and reducing data pipeline downtime by 20%.
- Implemented star and snowflake schema designs for data warehousing, collaborating cross-functionally to optimize query performance and support MOLAP and ROLAP reporting.
- Validated data pipeline design and conducted thorough testing across multiple workflows through cross-functional collaboration, resulting in a 30% reduction in data inconsistencies.

Data engineer, Moback

Oct 2020 - Mar 2022 | TG, IN

- Executed Teradata FastLoad processes to ingest over 10 million records daily, applying analytical thinking to optimize load times by 20% in high-volume transactional platforms.
- Developed detailed SSRS and SSAS reports with drill-down, matrix, and crosstab reporting features, improving report clarity and reducing stakeholder queries by 30%.
- Analyzed ETL performance tuning using SQL Profiler and indexing, achieving a 25% reduction in pipeline runtime and enhancing data pipeline stability.

EDUCATION

Doctorate in Management Science, Wayland baptist university (CGPA: 3.8)

Aug 2026 - Dec 2030 | TX, US
